

# Syllabus

for course at first level

**Moss and Lichen Floristics with Field Inventory Methods**  
**Moss- och lavfloristik med inventeringsmetodik**

**6.0 Higher Education  
Credits**  
**6.0 ECTS credits**

<b>Course code:</b>	BL2019
<b>Valid from:</b>	Autumn 2008
<b>Date of approval:</b>	2008-10-16
<b>Department</b>	Department of Biology Education
<b>Subject</b>	Biology
<b>Specialisation:</b>	G1N - First cycle, has only upper-secondary level entry requirements

## Decision

This syllabus has been approved by the Board of the Faculty of Science at Stockholm University.

## Prerequisites and special admittance requirements

Swedish upper secondary school courses Biology B, or equivalent.

## Course structure

Examination code	Name	Higher Education Credits
2019	Moss and Lichen floristics with Field Inventory Methods	6

## Course content

The course covers the moss and lichen flora of middle Sweden. The students are trained in field and lab identification.

## Learning outcomes

It is expected that the student after taking the course will be able to:

- identify the most common moss and lichen species from the flora of middle Sweden
- identify swedish mosses and lichens with the aid of literature
- show ability to find and collect organisms in the field, as well as prepare them for descriptive investigations
- apply her/his knowledge and make a simple inventory

## Education

The education consists of lectures, excursions, identification exercises, oral and/or written group assignments with presentations.

Participation in identification exercises, oral presentations, excursions and group education associated with this is compulsory. An examiner may rule that a student is not obliged to participate in certain compulsory education if there are special grounds for this after consultation with the relevant teacher.

## Forms of examination

a. Examination for the course is in the following manner: measurement of knowledge takes place through: Written and/or oral examination.

b. Grading is carried out according to a 7-point scale related to learning objectives:

A = Excellent

B = Very Good

C = Good  
D = Satisfactory  
E = Sufficient  
Fx = Fail  
F = Fail

c. Grading criteria for the course will be distributed at the start of the course.

d. A minimum grade of E is required to pass the course, together with:

- approved group assignments
- participation in all compulsory education.

e. Students who fail to achieve a pass grade in an ordinary examination have the right to take at least further four examinations, as long as the course is given. The term “examination” here is used to denote also other compulsory elements of the course. Students who have achieved a pass grade on an examination may not retake this examination in order to attempt to achieve a higher grade. Students who have failed to reach a pass grade on two occasions have the right to request that a different teacher be appointed to set the grade of the course. A request for such appointment must be sent to the departmental board.

### **Interim**

Students may request that the examination is carried out in accordance with this syllabus even after it has ceased to apply. This right is limited, however, to a maximum of three occasions during a two-year-period after the end of giving the course. A request for such examination must be sent to the departmental board.

### **Limitations**

The course can not be included in a degree together with the courses Moss and Lichen Floristics 10 p (BI3800) and Floristics and Faunistics with Field Inventory Methods 14 p (BI2110) or the equivalents

### **Misc**

The course is a component of the Bachelor's Programme in Biology-Earth Sciences, and it can also be taken as an individual course.

### **Required reading**

Course literature is decided by the departmental board and is described in an appendix to the syllabus.
