

Syllabus

for course at advanced level

Ecology and climate change II
Ekologi och klimatförändringar II

**7.5 Higher Education
Credits**
7.5 ECTS credits

Course code:	BL8053
Valid from:	Autumn 2011
Date of approval:	2010-08-20
Department	Department of Biology Education
Main field:	Biology
Specialisation:	A1F - Second cycle, has second-cycle course/s as entry requirements

Decision

This syllabus has been approved by the Board of the Faculty of Science at Stockholm University.

Prerequisites and special admittance requirements

Admittance to the course requires knowledge equivalent to Ecology and climate change II 7,5 credits (BL8052). (Three credits corresponds to approximately two weeks full-time studies). Swedish upper secondary school course English B or equivalent or one of the following tests. Cambridge CPE och CAE: Pass. IELTS : 6.0 (with no part of the test below 5.0). TOEFL (paper based): 550 (with minimum grade 4 on the written test part). TOEFL (computer based): 213. TOEFL (internet based): 79.

Course structure

Examination code	Name	Higher Education Credits
HELA	Ecology and climate change II	7.5

Course content

The course extends the theoretical insight acquired during Ecology and Climate change I. The main part of the course consists of work with a project, carried out independently or in a group. The project should deal with one or several questions within the field of ecology and climate change. The task includes a critical evaluation of methods and other projects.

Learning outcomes

It is expected that the student after taking the course will be able to: • plan, analyze, and present a project within the field of ecology and climate change, as well as critically evaluate other work within this field • observe, analyze and discuss how climate change influence ecological and evolutionary patterns and processes, at the level of populations, communities and ecosystems, as well as evaluating the effects on ecosystem services.

Education

The education consists of seminars and project work, individually or in group. Participation in seminars and project work and group education associated with this is compulsory. An examiner may rule that a student is not obliged to participate in certain compulsory education if there are special grounds for this after consultation with the relevant teacher.

Forms of examination

a. Examination for the course is in the following manner: measurement of knowledge takes place through: Written and oral presentations.

b. Grading is carried out according to a 7-point scale related to learning objectives:

A = Excellent

B = Very Good

C = Good

D = Satisfactory

E = Sufficient

Fx = Fail

F = Fail

c. Grading criteria for the course will be distributed at the start of the course.

d. A minimum grade of E is required to pass the course, together with:

• participation in all compulsory education

e. Students who fail to achieve a pass grade in an ordinary examination have the right to take at least further four examinations, as long as the course is given. The term “examination” here is used to denote also other compulsory elements of the course. Students who have achieved a pass grade on an examination may not retake this examination in order to attempt to achieve a higher grade. Students who have failed to reach a pass grade on two occasions have the right to request that a different teacher be appointed to set the grade of the course. A request for such appointment must be sent to the departmental board.

Interim

Students may request that the examination is carried out in accordance with this syllabus even after it has ceased to apply. This right is limited, however, to a maximum of three occasions during a two-year-period after the end of giving the course. A request for such examination must be sent to the departmental board.

Misc

The course is given in collaboration with the Department of Physical Geography and Quaternary Geology and is a component of the Master's Programme in Biology. The course can also be taken as an individual course.

Required reading

Course literature is decided by the departmental board and is described in an appendix to the syllabus.
