

Syllabus

for course at first level

**Marketing I
Marknadsföring I**

**7.5 Higher Education
Credits
7.5 ECTS credits**

Course code:	FE1303
Valid from:	Spring 2023
Date of approval:	2011-07-08
Changed:	2022-05-10
Department	Stockholm Business School
Main field:	Företagsekonomi
Specialisation:	G1N - First cycle, has only upper-secondary level entry requirements

Decision

This syllabus was approved by the Director of Undergraduate Studies at Stockholm University School of Business 2011-07-08. The last revision was approved by the Head of Department, Stockholm Business School, Stockholm University 2022-05-10.

Prerequisites and special admittance requirements

Swedish upper secondary school courses English B, Mathematics C and Social Sciences A or equivalent.

Course structure

Examination code	Name	Higher Education Credits
1303	Marketing I	7.5

Course content

The aim of this course is to provide a broad introduction to the topic of marketing. During the course, a lecture series that introduces key concepts, models and relationships between various marketing tools will be offered. The lectures also provide specific perspectives in areas that are central to today's marketers such as market strategy, business intelligence, market analysis, consumer behavior, branding as well as consumption's implications on sustainability. In parallel with the lecture series, the presented approaches will also be dealt with within the frame of a seminar series during which students' knowledge is applied and presented in the form of a group work project.

Learning outcomes

The overarching aim of the course is to provide a broad introduction to central perspectives, concepts and models within the field of marketing. Upon completion of the course, students should be able to:

Upon successful completion of this course, the student shall be able to:

Knowledge and understanding

1. Demonstrate ability to define central concepts within the field of marketing.
2. Demonstrate ability to explain and exemplify basic concepts.

Skills and abilities

3. Demonstrate ability to apply marketing approaches, concepts and models.
4. Demonstrate ability to analyze different theoretical marketing approaches in connection with application within different industries and connect these to sustainability.

Judgement and approach

5. Demonstrate ability to explain and justify the choice of theoretical approach.
6. Demonstrate ability to critically reflect on and evaluate the selected approaches.

Education

The teaching consists of lectures, seminars and group work, and requires a significant portion of self-study on the part of students.

The language of instruction is Swedish and English.

The teaching takes place mainly on campus. Some course activities may be carried out online/remotely.

For more detailed course information, see the study guide, published on the learning platform no later than one month before the course commences.

Forms of examination

a) Forms of examination

Assessment for the course will be continuous and is carried throughout the different course activities. Each assessment task is weighted in relation to its importance in the overall assessment of the course. The student's results from the different assessment tasks are added up to a total course score that will then translate into the final grade for the course.

Assessment tasks

The course contains the following weighted assessment tasks:

1. Individual final examination: assesses intended learning outcomes 1–6; constitutes 80% of total course points.
2. Group work project: assesses intended learning outcomes 3–6; constitutes 20% of total course points.

The examination is conducted in Swedish.

If the student has a certificate from Stockholm University with a recommendation for special support, the examiner has the opportunity to give an adapted test or let the student complete the test in an alternative way.

b) Grading scale

Grading takes place according to a criterion-referenced seven-point grading scale:

A = Excellent
B = Very good
C = Good
D = Satisfactory
E = Sufficient
Fx = Failed, some more work required
F = Failed, much more work required

c) Grading and assessment criteria

Grading criteria

The course's grading criteria are designed as overall assessments, combined qualitative descriptions of what the student is expected to do in order to demonstrate how well the course's learning outcomes are achieved. A

higher grade-level presupposes the abilities at lower levels.

A (Excellent)

The student demonstrates ability to evaluate and relate to the content of the course from a comprehensive, critically reflective perspective, as well as to transfer and apply insights in new, meaningful contexts.

B (Very Good)

The student demonstrates ability to, from an overarching and coherent perspective of the field, understand and use concepts to explain how different aspects of the course relate to each other, interconnect and become meaningful.

C (Good)

The student demonstrates ability to discuss the content, tasks and complex issues dealt with in the course from several well-developed but mainly independent perspectives.

D (Satisfactory)

The student demonstrates satisfactory ability to discuss the content, tasks and complex issues dealt with in the course in a way that, albeit in-depth and elaborate, is decidedly one-dimensional.

E (Sufficient)

The student demonstrates sufficient ability to discuss the content, tasks and complex issues dealt with in the course in a way that is decidedly one-dimensional.

Fx (Fail)

The student's knowledge, skills and abilities display minor flaws, overall or in significant parts.

F (Fail)

The student's knowledge, skills and abilities display major flaws, overall or in significant parts.

Assessment criteria

The course's assessment criteria, which serve as support for the assessment of the course's assessment tasks, are announced at the start of the course.

d) Final grade

The course comprises 0–100 course points. A passing grade (A–E) in the course requires that all learning outcomes are met, 50 course points and at least 50 points from individual assessment tasks.

The scale for the final grade is tied to fixed score intervals: A: 90–100; B: 80–89; C: 70–79; D: 60–69; E: 50–59; Fx: 45–49; F: 0–44. The grades correspond to the total course points a student obtains (over a total of 100) for all the weighted assessment tasks combined as part of the continuous assessment for the course. Current rounding rules are applied (0,5–0,9 course points are rounded up to the nearest higher, full course point).

Each assessment task is awarded 0–100 points. The points from an individual assessment task are multiplied by its percentage weight, constituting its course points. The course points for all assessment tasks are summed up to a total score between 0 and 100 course points. The total score is translated into a corresponding grade A–F.

Assessment task 1 is assessed on a 100-point scale.

Assessment task 2 (group work project) is assessed on a 100-point scale in the following intervals: 50, 55, 60, 65, 70, 75, 80, 85, 90, 95, and 100. The student must receive at least 50 points on the assessment task.

For more information on how the assessment tasks are assessed, see the study guide.

The student is responsible for completing the course's assessment tasks and obtaining a passing grade. If a passing grade is not obtained, the student can re-sit assessment task 1, at which the result is added to the course points achieved at the course's other assessment tasks. Acquired course points are forfeited if a passing grade is not obtained at the re-sit exam.

If 45–49 course points are achieved, a grade Fx is obtained. If less than 45 course points are achieved, a grade F is obtained.

A student who does not obtain a passing grade on the regular exam or the re-sit exam loses the course points obtained and is referred to re-register at a later course round.

Re-registration implies that:

- first-time registered students have priority access to the course's group registration;
- a students can re-sit assessment task 1 to obtain a passing grade without attending the course's learning activities or other assessment tasks.

Exemption from an assessment task is granted if the student presents a written certificate (e.g. a medical certificate), whereupon the student may re-sit the assessment task at a later date decided by the head of course, and while maintaining previously acquired course points.

The application for exemption should be submitted to the director of studies immediately after, or during planned absences well before the date when the assessment task is carried out. A granted exemption expires at the end of the immediately following semester.

e) Failed grades

For each course instance, two examination opportunities are normally offered. If during an academic year, a course instance is missing, at least one examination instance is offered.

A student who has received the grade F on an examination twice in a row by one and the same examiner have the right to have another examiner appointed at the next examination, unless there are special reasons to the contrary. The request is made to the director of studies.

A student who has received a passing grade on an examination may not retake the examination or complete a previously not completed assessment task to achieve a higher grade. A passing grade cannot be changed to a failing grade at the student's request.

Assessment tasks which are not submitted on time are not assessed.

f) Supplementary assignments

The grade Fx is not possible to complete.

Interim

If the course is discontinued, or its contents are substantially altered, students have the right to be examined according to this syllabus once per semester for three further semesters.

Limitations

This course may not be included in a degree together with a course, taken in Sweden or elsewhere, of identical or partially similar content.

Required reading

Course literature and other teaching materials are specified on the course's webpage no later than two months prior to the course commences.
