

# Education plan

for

**Master's Programme in Ecology and Biodiversity**  
**Masterprogram i ekologi och biodiversitet**

**120.0 Higher Education**  
**Credits**  
**120.0 ECTS credits**

**Programme code:** NEKBO  
**Valid from:** Autumn 2013  
**Date of approval:** 2012-02-01  
**Department:** Department of Biology Education

## Decision

This programme syllabus has been approved by the Board of the Faculty of Science at Stockholm University.

## Prerequisites and special admittance requirements

Admittance to the program requires a Bachelor's degree in Biology or equivalent. Swedish upper secondary school course English B or equivalent or one of the following tests; Cambridge CPE och CAE: Pass. IELTS : 6.5 (with no part of the test below 5.5). TOEFL (paper based): 575 (with minimum grade 4.5 on the written test part). TOEFL (internet based): 90 (with a minimum score of 20 in the written test part).

## Programme structure

The programme consists of compulsory and elective courses of 60 HEC, a degree project of at least 30 HEC and optional courses of up to 30 HEC.

## Goals

The main field of study is Ecology and Biodiversity. After completing the education program the student is expected to

- demonstrate knowledge and understanding in their main field of study, including both broad knowledge in the field and substantially deeper knowledge of certain parts of the field, together with deeper insight into current research and development work; and
- demonstrate deeper methodological knowledge in their main field of study.
- demonstrate an ability to critically and systematically integrate knowledge and to analyse, assess and deal with complex phenomena, issues and situations, even when limited information is available;
- demonstrate an ability to critically, independently and creatively identify and formulate issues and to plan and, using appropriate methods, carry out advanced tasks within specified time limits, so as to contribute to the development of knowledge and to evaluate this work;
- demonstrate an ability to clearly present and discuss their conclusions and the knowledge and arguments behind them, in dialogue with different groups, orally and in writing, in national and international contexts; and
- demonstrate the skill required to participate in research and development work or to work independently in other advanced contexts.
- demonstrate an ability to make assessments in their main field of study, taking into account relevant scientific, social and ethical aspects, and demonstrate an awareness of ethical aspects of research and development work;
- demonstrate insight into the potential and limitations of science, its role in society and people's responsibility for how it is used; and

- demonstrate an ability to identify their need of further knowledge and to take responsibility for developing their knowledge.

### **Courses**

Year 1 & 2.

Compulsory courses in the main field of study: Ecology FC, 15 HEC (BL5005), alternatively, Evolution and Biodiversity FC, 15 HEC (BL5006)

Biodiversity: Patterns and Processes SC, 7,5 HEC (BL8001), Evolutionary Ecology SC, 7,5 HEC (BL8017), Science in Biological Research and Investigation SC, 7,5 HEC (BL8008), Degree Project in Ecology and Biodiversity SC, 30/45/60 HEC (BL9037/BL9038/BL9039).

Elective courses:

Courses of at least 22,5 HEC from a list of elective courses. The elective courses are decided by the department board. The list of all elective courses should be updated before each new academic year. Before the start of a programme, there should be a list of the minimum number of courses where teaching is guaranteed during the programme.

Optional courses 0-30 HEC.

### **Degree**

Master's degree.

### **Misc**

Students who have been admitted to the programme but not completed it during the scheduled two/three years can request to complete the program even after the programme syllabus no longer applies. In such cases, the limitations stated in the course syllabus apply.
