Decision

This programme syllabus has been adopted by the Social Sciences Faculty Board 2013-09-04, last revision conducted 2017-10-11.

Prerequisites and special admittance requirements

A Bachelor's degree comprising of 180 ECTS or equivalent, and English 6 or equivalent.

Programme structure

The Master programme in Operations Management and Control is offered by Stockholm Business School at Stockholm University as a cohesive programme with a broad topical approach with focus on management and accounting. The language of instruction is English.

The programme is constructed around a plethora of social science perspectives that enable problematization and critical-creative analysis of phenomena, trends, and changes in society and business, thus creating an understanding of how we, in interaction with these phenomena, are shaped as thinking, feeling, and acting human beings.

Goals

The overall purpose of the programme is to produce knowledge and experience, through which students learn to think innovatively, develop their self-awareness and decisiveness and use these capacities for qualified leadership tasks in society, in businesses and other organizations, in Sweden as well as internationally; as well as to prepare for research studies in business administration.

Upon completion of the programme students shall:

Knowledge and Understanding

- demonstrate knowledge and understanding in management and accounting, including both an overview of the fields and specialised knowledge in certain areas of the fields as well as insight into current research and development work;
- demonstrate specialised methodological knowledge in management and accounting;

Competence and Skill

- demonstrate the ability to critically and systematically integrate knowledge and analyse, assess and deal with complex phenomena, issues and situations even with limited information;
- demonstrate the ability to identify and formulate issues critically, autonomously and creatively as well as to

plan and, using appropriate methods, undertake advanced tasks within predetermined time frames and so contribute to the formation of knowledge as well as the ability to evaluate this work;

- demonstrate the ability in speech and writing both nationally and internationally to report clearly and discuss his or her conclusions and the knowledge and arguments on which they are based in dialogue with different audiences;
- demonstrate the skills required for participation in research and development work or autonomous employment in some other qualified capacity;

Judgement and Approach

- demonstrate the ability to make assessments in management and accounting informed by relevant disciplinary, social and ethical issues and also to demonstrate awareness of ethical aspects of research and development work;
- demonstrate insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used;
- demonstrate the ability to identify the personal need for further knowledge and take responsibility for his or her ongoing learning.

Courses

Semester 1

This semester is comprised of four mandatory courses on a graduate level within the field of study of management and accounting, with a total of 30 higher education credits.

- Operations Strategy, 7,5 higher education credits;
- Management Control and Financial Analysis, 7,5 higher education credits;
- Business Analytics: Data, Models and Decisions, 7,5 higher education credits;
