Decision

This programme syllabus was approved by the Social Sciences Faculty Board on 2015-10-07.

Prerequisites and special admittance requirements

Bachelor's degree 180 credits, of which 60 credits in business administration and 30 credits in economics; or 60 credits in economics and 30 credits in business administration. It is also required that students have 7,5 credits in mathematics and 7,5 credits in statistics. English B/English 6 or the equivalent.

Programme structure

Semester 1

The first part of the first semester students with prior knowledge mainly in economics take two courses in business administration and students with prior knowledge mainly in business administration take two courses in economics. The second part of the semester is common for all students and consists of one course in business administration and one in economics.

Semester 2

The second semester consists of compulsory courses, two in business administration and two in economics.

Semester 3

The third semester aims at deepening and specialising students' knowledge. The first part of the semester consists of two courses in business administration; one is compulsory and the other an elective. The second part includes two courses that aim at integrating business administration and economics and are provided jointly by the School of Business and the Department of Economics.

Semester 4

The programme is concluded with an independently completed master's dissertation (30 HE credits) in either business administration or economics.

Goals

The overall aim of the programme is to prepare students for professional careers as financial analysts, financial controllers, risk analysts or chief financial officers in larger companies, in Sweden and internationally, as well as to prepare students for doctoral studies in finance.

Upon completion of the programme students are expected to:

Knowledge and Understanding

- demonstrate knowledge and understanding in the main field of study, including both an overview of the field and specialised knowledge in certain areas of the field as well as insight into current research and development work;
- demonstrate specialised methodological knowledge in the main field of study;

Competence and Skill

- demonstrate the ability to critically and systematically integrate knowledge and analyse, assess and deal with complex phenomena, issues and situations even with limited information;
- demonstrate the ability to identify and formulate issues critically, autonomously and creatively as well as to plan and, using appropriate methods, undertake advanced tasks within predetermined time frames and so contribute to the formation of knowledge as well as the ability to evaluate this work;
- demonstrate the ability in speech and writing both nationally and internationally to clearly report and discuss his or her conclusions and the knowledge and arguments on which they are based in dialogue with different audiences;
- demonstrate the skills required for participation in research and development work or autonomous employment in some other qualified capacity;

Judgement and Approach

- demonstrate the ability to make assessments in the main field of study informed by relevant disciplinary, social and ethical issues and also to demonstrate awareness of ethical aspects of research and development work;
- demonstrate insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used;
- demonstrate the ability to identify the personal need for further knowledge and take responsibility for his or her ongoing learning.

Courses

In this section the courses included in the programme are specified. Each course has a separate course syllabus establishing the main content of the course, the expected learning outcomes, course structure, examination formats and grading criteria.

Semester 1

The first semester consists of four courses in the field of banking and finance. The courses included in the programme cover the following:

Courses for students with economics as their main field of study:

- Financial Reporting
- Corporate Finance

Courses in business administration cover financial analysis focusing on profitability and cash flow, as well as basic financial theory including portfolio theory, capital structure etc.

Courses for students with business administration as their main field of study:

- Intermediate Microeconomics, 7.5 HE credits
This is a course in economics focusing on microeconomics.
