

# Syllabus

for course at advanced level

**Intelligence and Security Informatics**

**Säkerhetsinformatik för underrättelseanalys**

**7.5 Higher Education**

**Credits**

**7.5 ECTS credits**

<b>Course code:</b>	ML476N
<b>Valid from:</b>	Autumn 2022
<b>Date of approval:</b>	2022-04-07
<b>Department</b>	Department of Computer and Systems Sciences
<b>Main field:</b>	Computer and Systems Sciences
<b>Specialisation:</b>	A1F - Second cycle, has second-cycle course/s as entry requirements

## Decision

This syllabus was approved by the Head of the Department 2022-04-07.

## Prerequisites and special admittance requirements

90 credits in computer and systems sciences including at least 15 credits in information security (or equivalent).

## Course structure

Examination code	Name	Higher Education Credits
SUAI	Intelligence and Security Informatics, assignment	3.5
SUAT	Intelligence and Security Informatics, written exam	4

## Course content

The course provides both practical and theoretical knowledge of how information technology can be used for intelligence analysis and security-related applications and covers the following:

- Technology and method for analysis of data from the Internet
- Text analysis: how to generate structured information from unstructured text
- Author recognition and profiling
- Social network analysis (SNA)
- Psychology and psychometry
- Influence and deception
- Violent extremism and the internet
- Ethical aspects

## Learning outcomes

Upon successful completion of the course the student should be able to:

- have knowledge of how information technology can be used for security-related applications
- understand methodological challenges and opportunities that the use of information technology for analysis of security-related data entails
- have knowledge of ethical aspects of data analysis.

## Education

The teaching and learning activities in the course are: lectures and seminars.  
The language of instruction is English.

### **Forms of examination**

a. The course is examined through written exam and assignments.

All examination tasks must be performed and submitted on time according to the schedule of the current course. A missed or incomplete examination can be re-submitted at a scheduled time window. Alternatively, the student will have to follow the schedule of next instance of the course.

b. The final grading of the course is based on the following grading scale related to the learning outcomes of the course: A = Excellent, B = Very Good, C = Good, D = Satisfactory, E = Sufficient, Fx = Fail, F = Fail.

c. The grading criteria are communicated to the students at the start of the course.

d. In order to complete the whole course segment the student must obtain at least grade E in all course components/examinations. If there are multiple examinations with grading A to F, the average of the grades is calculated by converting letters into numbers in the following way: A = 4, B = 3, C = 2, D = 1, E = 0. The average is calculated relatively to the number of credits of the various components/examinations and the number of credits of the course. The final grade of the course is thus a weighted average of the course components/examinations. If the average is in between two grades, 2/3 parts of the higher grade are required in order to round up the average.

e. In addition the following regulations also apply:

- Students who obtain the grade Fx in a written examination task are allowed to complete a supplementary assignment in order to elevate the grade to E.

The examiner informs the concerned students when the results of the written examination are published. The supplementary assignment has to be submitted within a given deadline and can only be utilized to elevate the grade of the actual examination task.

- Students who obtained grade E in an examination task are not allowed to re-write the examination or resubmit the assignment in order to obtain a higher grade.

- Students who have failed the same examination task twice are entitled to have another examiner appointed, unless there are special reasons to the contrary.

### **Interim**

When a course is discontinued, or its contents are substantially altered, the following applies:

- Failed examination tasks are replaced with other similar examination tasks according to a specific plan.

- If no similar examination tasks can be provided, at least three examination opportunities per examination task should be offered during a period of at least three terms from the date of the decision. After this period, no examinations should be carried out on the course.

### **Limitations**

This course may not be included in a degree together with a course, taken in Sweden or elsewhere, of identical or partially similar content.

### **Required reading**

Information about course literature is available on the department's website - [www.dsv.su.se](http://www.dsv.su.se) - at least two months before the start of the course.
