

Syllabus

for course at advanced level

Cancer Biology
Cancersn biologi

7.5 Higher Education
Credits
7.5 ECTS credits

Course code:	BL7005
Valid from:	Autumn 2007
Date of approval:	2006-09-27
Department	Department of Biology Education
Subject	Biology

Decision

This syllabus has been approved by the Board of the Faculty of Science at Stockholm University.

Prerequisites and special admittance requirements

Admittance to the course requires knowledge equivalent to a minimum of 120 credits in Biology and Chemistry, including a minimum of 30 credits in Chemistry and 15 credits in Cell and Molecular Biology. (Three credits corresponds to approximately two weeks full-time studies). Swedish upper secondary school course English B or equivalent or one of the following tests. Cambridge CPE och CAE: Pass. IELTS : 6.0 (with no part of the test below 5.0). TOEFL (paper based): 550 (with minimum grade 4 on the written test part). TOEFL (computer based): 213. TOEFL (internet based): 79.

Course structure

Examination code	Name	Higher Education Credits
7005	Cancer biology	7.5

Course content

The course covers cancer processes from a biological point of view and describes the mechanisms for the origin of cancers. The course also illustrates the genetic and epigenetic changes involved in tumor development. The following areas will be addressed: cell signalling, cyclins and cyclin-dependent kinases, receptors and growth factors, oncogenes and tumor suppressor genes, genomic instability and DNA repair, telomeres and aging, mechanism-based cancer therapy and risk models of cancer.

Learning outcomes

It is expected that the student after taking the course will be able to:

- describe the incidence of different tumors, inherited and sporadic, together with different types of risk factors
- describe the molecular and cellular changes that are characteristic of cancer development
- read and critically analyze relevant original scientific literature

Education

The education consists of lectures, seminars, group work and literature exercises.

Participation in seminars, group work as well as presentation of the literature exercises and group education associated with this is compulsory. An examiner may rule that a student is not obliged to participate in certain compulsory education if there are special grounds for this after consultation with the relevant teacher.

Forms of examination

a. Examination for the course is in the following manner: measurement of knowledge takes place through: Written and/or oral examination as well as written and oral presentations.

b. Grading is carried out according to a 7-point scale related to learning objectives:

A = Excellent

B = Very Good

C = Good

D = Satisfactory

E = Sufficient

Fx = Fail

F = Fail

c. Grading criteria for the course will be distributed at the start of the course.

d. A minimum grade of E is required to pass the course, together with:

• participation in all compulsory education

e. Students who fail to achieve a pass grade in an ordinary examination have the right to take at least further four examinations, as long as the course is given. The term “examination” here is used to denote also other compulsory elements of the course. Students who have achieved a pass grade on an examination may not retake this examination in order to attempt to achieve a higher grade. Students who have failed to reach a pass grade on two occasions have the right to request that a different teacher be appointed to set the grade of the course. A request for such appointment must be sent to the departmental board.

Interim

Students may request that the examination is carried out in accordance with this syllabus even after it has ceased to apply. This right is limited, however, to a maximum of three occasions during a two-year-period after the end of giving the course. A request for such examination must be sent to the departmental board.

Misc

The course is a component of the Master's Programme in Biology and Molecular Life Sciences, and it can also be taken as an individual course.

Required reading

Course literature is decided by the departmental board and is described in an appendix to the syllabus.
