| <b>Date of approval:</b> | 2006-09-27  |
| <b>Department</b>        | Department of Mathematics (incl. Math. Statistics)                      |
| <b>Subject</b>           | Mathematical Statistics   |
| <b>Specialisation:</b>   | A1N - Second cycle, has only first-cycle course/s as entry requirements |

## Decision

This syllabus has been approved by the Board of the Faculty of Science at Stockholm University on 27 September 2006.

## Prerequisites and special admittance requirements

Prerequisites for the course is knowledge equivalent to 120 hp in mathematics and mathematical statistics, of which 45 hp in each subject. Also required is knowledge equivalent to Swedish upper secondary school course English B or equivalent to one of the following tests; Cambridge CPE and CAE: Pass, IELTS: 6.0 (with no part of the test below 5.0), TOEFL (paper based): 550 (with minimum grade 4 on the written test part), TOEFL (computer based): 213, TOEFL (internet based): 79.

## Course structure

| Examination code | Name                          | Higher Education Credits |
|------------------|-------------------------------|--------------------------|
| S717             | Insurance Law for Actuaries I | 7.5                      |

## Course content

The study of the legal frameworks structure gives us an insight into the rule of laws nature, the laws division and sources of law: legislation, legal usage and the legal literature (the doctrine). Further, the course gives us knowledge concerning the Swedish rights international dependence, not only what the membership in EU means, but also the public law development. In the public civil rights the public wealth law questions and contract law questions, especially the buying and contract laws are studied. Further, especially the association laws and indemnity laws are studied. In the insurance contract law the insurance companies and insurance receivers rights are studied.

## Learning outcomes

It is expected that the student after taking the course will be able to:

- \* describe basic rules in the law system
- \* be able to use easy methods for solving juridical problems
- \* describe the most important concepts and rules within the central parts of the capital law

## Education

The education consists of lectures.

## Forms of examination

a. Examination for the course is in the following manner: measurement of knowledge takes place through written examination.

b. Grading is carried out according to a 7-point scale related to learning objectives:

A = Excellent

B = Very Good

C = Good

D = Satisfactory

E = Sufficient

Fx = Fail

F = Fail

c. Grading criteria for the course will be distributed at the start of the course.

d. A minimum grade E is required to pass the course.

e. Students who fail to achieve a pass grade in an ordinary examination have the right to take at least further four examinations, as long as the course is given. The term "examination" here is used to denote also other compulsory elements of the course. Students who have achieved a pass grade on an examination may not retake this examination in order to attempt to achieve a higher grade. Students who have failed to reach a pass grade on two occasions have the right to request that a different teacher be appointed to set the grade of the course. A request for such appointment must be sent to the departmental board.

### **Interim**

Students may request that the examination is carried out in accordance with this syllabus even after it has ceased to apply. This right is limited, however, to a maximum of three occasions during a two-year-period after the end of giving the course. A request for such examination must be sent to the departmental board.

### **Limitations**

The course may not be included in a degree together with the course "Insurance Law for Actuaries I" (MS 3220).

### **Misc**

The course is given in cooperation with Juridicum, Department of Law.

The course is a component of the Master's Programme in Actuarial Mathematics, and it can also be taken as an individual course.

### **Required reading**

Course literature is decided by the departmental board and is described in an appendix to the syllabus.
